Mission Eridani

Objectives Model Plan

Target GREG: Grey Eminence Against A Gangster Operation

Introduction

I encountered two discs with kiddie porn, over a period of 11 years and both came from an old friend. The first disc was found in a used DVD-player I bought in 2005 and the seller had forgotten it inside the player. The seller had been in possession of the disc. I destructed it immediately before I watched anything, because it was clearly illegal. The second disc was found in my office in 2016 and was already destructed in a shredding machine. I had been outside and the troll came into my apartment, because he knew that I knew about him and he meant to give me a warning.

Analysis

The pedophiles distribute their material mostly on optical media, so it's very easy to destruct the evidence in case of a Police raid. I took a picture of the disc I found, but sadly, bad circumstances forced me to delete it.

My old friend was the leader of some pedophiles here in Nesodden county and they are part of an international kiddie porn ring. It's called a "ring" because the pedophiles have "a ring of trust".

A partner of my old friend was also a pedo and lives somewhere in my local county, but I only know his first name and I can recognise him though I haven't seen him since 2008.

In addition, I know about two other pedophiles in my former neighbourhood. They have a temporary house with two girls who I met in 2015 and they were 12 years old at that time. They saw me and cried for help. I got their message and I believe they know that I know about the pedos.

There must be a storage facility for kiddie porn in my local county. I believe the pedos move it around, just like they have temporary houses where they keep their abuse victims.

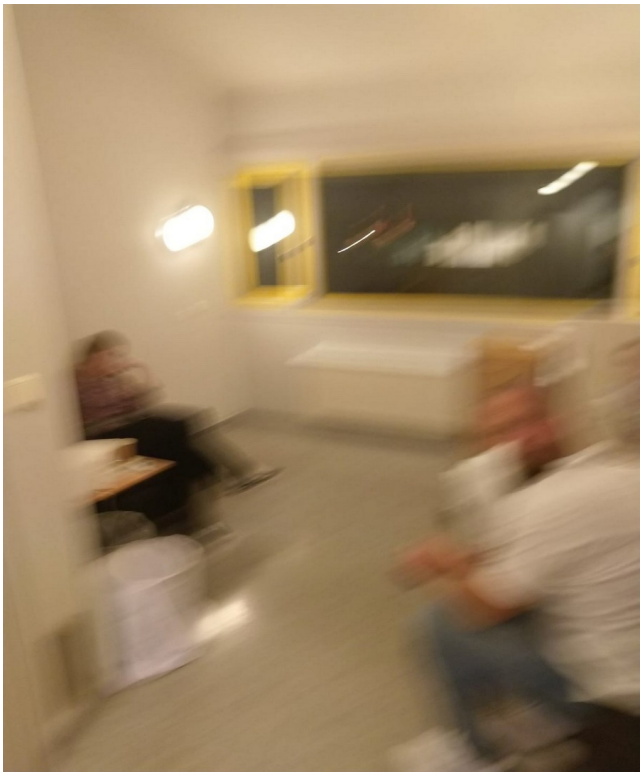

Close to the temporary house with two girls that I mentioned, there's an apartment which had a sticker on a window with a logo with the name "Low-Life Productions". I believe it was a hint about the kiddie porn producers. I took another look later and the sticker is now removed.

I attach an image for an illustration of the mentality of Low-Life Productions and it could have been a cover graphic for their discs. Their graphics are often childish, but with nice drawings and colours to attract “little curious scientists”.

The connection with Psychiatry

A young girl in the mental hospital had been kept there for at least nine months, because I met her before. She had anorexia and she was 14 years old. A pedophile nurse fell in love with her. He would not ever leave her alone, and he used to lock her bathroom door to prevent her from throwing up her food. The girl told me that she was going to a different hospital for real anorexia treatment, but the pedophile nurse made it so she had to stay for as long as nine months more. You can see a glimpse of her on her bed, on the right side of this picture.

Here’s a recent picture of the pedophile nurse who imprisoned the girl.

I met this person in the mental hospital in December 2018. I heard him on the phone when he thought nobody were listening, and he said: "I am pedophile and they have me." He’s talented in pretending to be mentally backward, but everything he does is a play for the gallery and an act for children. He’s dangerous.

Psychiatry thinks the reason why people become pedophiles, is because they have been sexually abused. They believe that if you were sexually abused, you might automatically become an abuser yourself when you become an adult. So, they force the abuse victims into therapy. That's why there are very few abuse victims who will come forward and tell about the pedophiles.

Psychiatry is protecting the pedophiles and has sympathy with them. Even though pedophilia is a grave mental illness, Psychiatry ignores that the pedophiles are hardcore scumbags, so they create hindrances for the capture of the pedos.

Epilogue

I alerted the Police about the kiddie porn, but they didn't take me seriously. Nobody wants to investigate kiddie porn.

How to deal with the cunning pedophiles is a difficult matter. I got tired of the case, though I haven't done enough. I tried to gather evidence against the pedophiles, but it seems impossible to bring them to justice. Besides, I don't have Police authority, so I had limited means of investigation.

The main pedophile took suicide in 2020. I heard his partner had taken suicide later, but this is not confirmed. They were supposed to go to prison, but they chose the hard way out of their crimes.
